2023	8	City Unscripted —local tour host in Kyoto (current)
2025	9	Senren, Inc. —Software Engineer (part-time, hybrid, concurrent with studies; currently between projects)
2026	7	Zen Inc. —Software Engineer (current)
		End

Year	Mo.	Licenses & Certifications
2023	8	Japanese-Language Proficiency Test (JLPT) —N1
2025	5	TOEFL iBT —116 / 120

Motivation, Personal Statement, Hobbies & Special Skills

International student from Myanmar, currently in the Computer Science Course of the Informatics Department at Kyoto University's Faculty of Engineering. Fluent in English (TOEFL iBT 116) and Burmese, JLPT N1 in Japanese, with foundations in Spanish and Chinese.

Working concurrently as a software engineer at Zen Inc. and Senren, Inc., where I build full-stack features on GCP using Next.js, FastAPI, Playwright, and PostgreSQL.

For my undergraduate thesis at the Symbol Emergence Systems Lab (Prof. Tadahiro Taniguchi), I extended MARL-CPC —a variational framework for emergent communication in multi-agent reinforcement learning —to multi-round message passing with 3–5 agents.

Hobbies: language learning, walking, exploring Kyoto.

Commute time

approx. 0 h 30 min

Dependents (excl. spouse)

0

Spouse: None

Spousal support obligation: None

Personal preferences (compensation, role, working hours, other —if any)

Seeking a software engineering role. Experienced across Python, OCaml, C, Java, TypeScript / JavaScript, Dart, SQL, and Verilog. Day-to-day I work with Next.js, FastAPI, PostgreSQL, GCP (Cloud Run, Cloud SQL), and Playwright. Open to working conditions per company policy.
